Subject: Application for the Senior UI/UX Simulation Designer – Maritime & Defence Systems

Dear Hiring Manager,

I am excited to apply for the Senior UI/UX Designer position at your organisation. With over 20 years of experience in 2D and 3D simulation, particularly in the marine and defence sectors, I combine technical expertise, creative vision, and team leadership to deliver user-centric design solutions.

At ARI Simulation (a subsidiary of Zen Technologies Limited) in Delhi, I have led the design and development of real-time 3D environments, training interfaces, and user-focused design systems. My responsibilities span the full simulation pipeline, including 3D modelling (3ds Max), texturing, UI/UX design, and creative direction using Adobe Creative Cloud tools, while managing a team of three designers to achieve high-quality, scalable outcomes.

I hold an MBA in Business Studies from Pondicherry University and a Diploma in Future Arts with a specialisation in Lighting & Shading from an Autodesk authorised training centre in New Delhi, complemented by certification in Advertising for Print. This academic foundation strengthens my strategic and visual design capabilities.

I am particularly drawn to international markets for their emphasis on innovation, clean design, and collaborative work environments. I am confident that my blend of leadership, product strategy, and hands-on design expertise will allow me to deliver meaningful impact from day one.

Please find my resume attached. I would welcome the opportunity to discuss how my experience can support your projects and design vision.

Thank you for your time and consideration.

Warm regards,
Amrendra Kumar Amar
